Open to credit-bearing internships

Highly analytical and results-driven Software Engineer with 5 years of experience delivering robust software solutions, automated workflows, and reliable infrastructure configurations. Proven track record in transitioning from graduate roles to core engineering ownership, with proficiency in optimising system performance and ensuring data integrity. A University of Melbourne alumnus majoring in Computing and Software Systems, currently advancing technical expertise through postgraduate studies in Applied Artificial Intelligence at NTU, Singapore.

Skills

Software Languages: Python, C#, JavaScript, Go

Frameworks: .NET (Blazor, Razor Pages, Entity Framework), HTMX, AlpineJS, React

Cloud & DevOps: Azure (App Service, CI/CD), Docker, GitHub Actions, Copilot, JetBrains AI

Databases & Analytics: SQL Server, PostgreSQL, Power BI, DAX, SQLite

Soft Skills / Methodologies: Technical Leadership, Stakeholder Management, Agile/Scrum, Shape Up

Spoken Languages: Fluent in English (native), Assamese (native), Hindi (advanced), Korean (conversational)

Experience

Mercor — Feb 2026 – May 2026

Remote, US-based | Contract

AI Code Reasoning Auditor

- Performed code logic verification and LLM output reviews for generated feature implementations and bugfixes in C#, Go, and Python, to ensure production-grade AI training data.
- Maintained high accuracy and throughput for annotation workflows, with an 80% first-pass acceptance rate.

Walter and Eliza Hall Institute of Medical Research — Feb 2021 – Sep 2025

Melbourne, Australia | Full-time

Software Engineer — *Jan 2023 – Sep 2025*
Software Developer — *Feb 2022 – Dec 2022*
Graduate Software Developer — *Feb 2021 – Jan 2022*

- Led development for an enterprise inventory/manufacturing system using .NET Razor Pages and EF Core, replacing legacy paper processes to cut 12+ manual labour/audit hours weekly.
- Migrated legacy applications to a containerized, self-hosted architecture, reducing Azure cloud overhead by 10% during an institute deficit-recovery initiative.
- Accelerated junior engineer onboarding via standardised review guidelines while integrating JetBrains AI/GitHub Copilot into team workflows to boost overall development velocity.
- Shipped major backend/UI upgrades for internal financial grant tracking tools and built executive Power BI/DAX dashboards for complex reporting needs.

Education

Master of Computing (Applied AI), Ongoing
Nanyang Technological University | 2026 – 2027

Bachelor of Science (Computing & Software Systems), First Class Honours
University of Melbourne | 2018 – 2020

Projects

PROFILARR AUTOMATION, PERSONAL PROJECT (2025)

Python | GitHub Actions | YAML | RegEx Parsing

- Consolidated profiles from different open-source projects for use in a media automation stack for quality profile configurations in self-hosted media servers, running nightly synchronisation workflows with upstream repositories.
- Automated the synchronisation of disparate YAML configurations via Python and GitHub Actions, implementing RegEx-based conflict resolution to maintain a unified media metadata schema.

Volunteering

Event Operations & Support | TEDxNTU, PAX AUS, TGX, Oz Comic-Con (2022 – 2026)

- Co-ordinated with cross-functional staff and security teams to maintain schedule continuity and venue safety protocols.
- Delivered front-facing support and dispute resolution for thousands of attendees across major conventions.
- Managed live floor incident response and crowd flow control under fast-paced, high-density conditions.
